Navy League 2002, Big Island Retired Military Association, DAV, Hilo Storm Team Manager 1999, Special Olympics Volunteer.

The most pressing issues in our district are Education, Economy, & Environmental protection. The way to stimulate our economy and protect our environment is through education! This will take an overhaul and decentralization of our present system. DOE'S request for more time and bureaucracy is not the answer. Local School Boards made up of local citizens is the only answer to local problems. Oahu has had decades under the existing structure to improve our primary and secondary schools. Look at the results!

The solution is multi-faceted. Encourage independent thinking and self-help. Partner with local business to teach trades. Encourage school adoption by local business. Last but not least, create an environment that produces personnel that business can employ.
